

GIRLS
GARAGE

YEAR ONE: 2016-2017 CURRICULUM

Girls Garage courses are designed along a two-year pathway, combining regular and rotating class content allowing girls to earn all 10 skill badges. We offer wood, metal, and community design/build classes each after-school session, with a topical lab class that rotates each season. Our summer classes bring all these skills together in an intensive project-based week of building!
